

Product Specification

Thermobond PC Drain

Thermobond hot melt sealant is used to level differences in height at splice areas at T-joints and Cross-joints.

Technical data

ø, pipe (mm)	Length (mm)	Collar (mm)	Flow rate (L/sec)	Package (pcs/carton)
60	300	500x500	1.6	5
90	300	500x500	5.2	5
110	300	500x500	8.9	5

Availability depending on country. Contact your local supplier for more information

Storage

Store cool and dry in the original packaging. There are no limitations in shelf life.

Thermobond

Thermobond seaming technique is unique and patented by SealEco. Thermobond is based on a thermoplastic rubber (TPE-base) that can be seamed with conventional seaming methods for plastic material like hot air or hot wedge seaming.

The Thermobond material is the base for a full range of accessories that gives good system solutions combining the unique properties of an elastomeric membrane with the seaming properties of the thermoplastics.

Installation instructions

Please consult installation manual before use.
